

## BENT-AXIS PISTON PUMPS

HBP

HBP is a range of rugged bent-axis spherical piston pumps, particularly fitting for mobile applications.

The design of HBP pumps results in a compact unit with a small number of moving parts and high starting torque, covering a wide displacement range (from 10 to 130 cm<sup>3</sup>/rev), and working at a maximum pressure of 400 bar..

Thanks to their robustly sized double tapered roller bearings, HBP pumps can withstand high shaft loads and achieve excellent speed features.

Materials chosen, their treatments as well as the finishing of the parts lead to a high reliability level.

### TECHNICAL DATA

|                                      |                                      | 12    | 17    | 25    | 34    | 47    | 56    | 64    | 84    | 108   | 130   |
|--------------------------------------|--------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Displacement                         | cm <sup>3</sup> /rev                 | 12,6  | 16,2  | 25,4  | 34,2  | 47,1  | 56,0  | 63,6  | 83,6  | 108,0 | 130,0 |

| Rotating parts moment of inertia     | kg m <sup>2</sup> · 10 <sup>-3</sup> | 0,9   | 0,9   | 1,1   | 1,1   | 2,6   | 2,6   | 2,6   | 7,4   | 7,4   | 7,4   |
| Approx. weight                       | kg                                   | 7,5   | 7,5   | 8,5   | 8,5   | 15,5  | 15,5  | 15,5  | 27,0  | 29,5  | 29,5  |

#### Notes:

- (1) Stated maximum continuous speed values are valid for an absolute pressure of 1 bar at the suction inlet.
- (2) By increasing the input pressure, the rotational speeds can be increased to the maximum admissible.
- (3) Stated maximum continuous power values are based on maximum output power without external cooling of the pump.
